Test Plan

Project: URL

Test the following pages:

List of pages.

Test types:

1. Layout testing(PSD mockups, slider and animations, ajax loader, screen resolution <http://quirktools.com/screenfly/>)
2. Cross-browser compatibility on Windows 8:
 - Chrome (last version)
 - IE10+
 - FireFox (last version)
 - Opera (last version)
3. Cross-platform:
 - Mac mini - MAC OS X (Safari, Chrome)
 - iPad mini Retina (Safari, Chrome)
 - iPhone 5C Retina (Safari, Chrome)
4. Usability
5. GUI
6. Functional testing of feedback form.
7. Localization
8. Regression
9. Acceptance.

Testing Schedule and terms:

1. Analysis of user interface requirements and functional specifications.(1 hour)
2. Design test cases to the feedback form (4 hours)
2. Perform testing in the sequence which is defined in section “**Test types**” (8 hours)
3. Regression testing (3 hours).

Criteria for the start of testing:

- test cases have been designed to the feedback form.
- home page has been marked up and smoke testing is passed.

Criteria for the end of testing:

- all bugs should be fixed which level of severity is Critical, Blocker, Major and Minor.
- bugs are permitted which level of severity is Trivial.
- all images should be optimized to the retina devices.
